Platforms for Nutrition

Nutrition accountability needs strengthening

SDG2 target 2.2 & WHA set ambitious targets (“end all forms of malnutrition by 2030”)

the GNR 2014 states that “there a need for data revolution”

→ More can be done with existing data
AND
Demand for data analysis to answer
policy questions must be stimulated

National Information Platforms for Nutrition

Objectives

“To provide support to countries to strengthen their capacities to analysis data so as to better inform the strategic decisions they are faced with to prevent malnutrition and its consequences”

Based on a proven concept

- Build on experience of the National Evaluation Platforms (NEP), by JHU - data analysis to inform health sector decisions

**NIPN TAKES THE APPROACH TO THE
NEXT, MULTISECTORAL, LEVEL**

The NIPN principles are:

- Country driven
- Country owned
- Multi-sectoral & multi-stakeholders approach to nutrition
- Use multiple data sources
- Undertakes robust, high-quality & timely nutrition-relevant analysis

The Platform's Operational Framework

National stakeholders
and policy makers

Nutrition policies
and programmes
design and monitoring

NIPN advisory committee
Formulation of questions for analysis
and dissemination of results

Questions

based on
governments'
priorities

Input data

From routine
and ad-hoc surveys,
programme monitoring,
resource tracking

NIPN staff
Data quality assessment,
data management and analysis

The Platform's Operational Framework

National stakeholders
and policy makers

Nutrition policies
and programmes
design and monitoring

NIPN advisory committee
Formulation of questions for analysis
and dissemination of results

Questions

based on
governments'
priorities

Analysis

of the nutrition
specific/sensitive drivers
of changes in malnutrition
over time and space

Input data

From routine
and ad-hoc surveys,
programme monitoring,
resource tracking

NIPN staff
Data quality assessment,
data management and analysis

The Platform's Operational Framework

National stakeholders
and policy makers

Nutrition policies
and programmes
design and monitoring

NIPN advisory committee
Formulation of questions for analysis
and dissemination of results

Outputs
Inform policy
makers and
improve
programmes

Questions

based on
governments'
priorities

Findings

develop plausible
evidence of the
effectiveness of
interventions

Analysis

of the nutrition
specific/sensitive drivers
of changes in malnutrition
over time and space

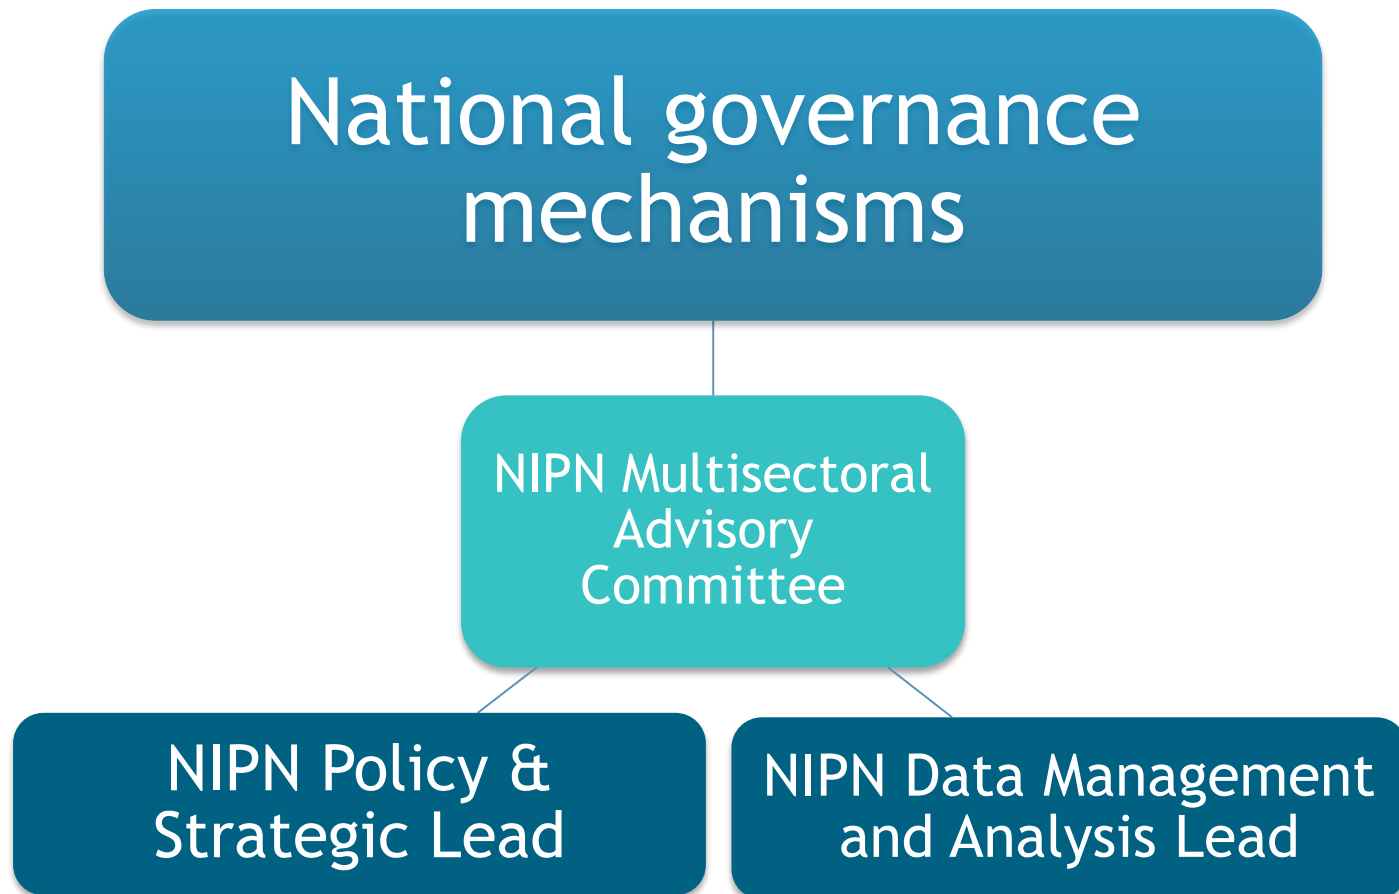

Input data

From routine
and ad-hoc surveys,
programme monitoring,
resource tracking
