National Information  
Platforms for Nutrition

Title: Web-based tool for collecting and prioritising  
prioritisation of nutrition questions

Martha María Pacay

NIPN Global Gathering, Wednesday 5 October 2022

Proyecto PiNN  
PLATAFORMA DE INFORMACIÓN  
NACIONAL SOBRE NUTRICIÓN

SECRETARÍA DE SEGURIDAD  
ALIMENTARIA Y NUTRICIONAL  
DE LA PRESIDENCIA  
DE LA REPÚBLICA

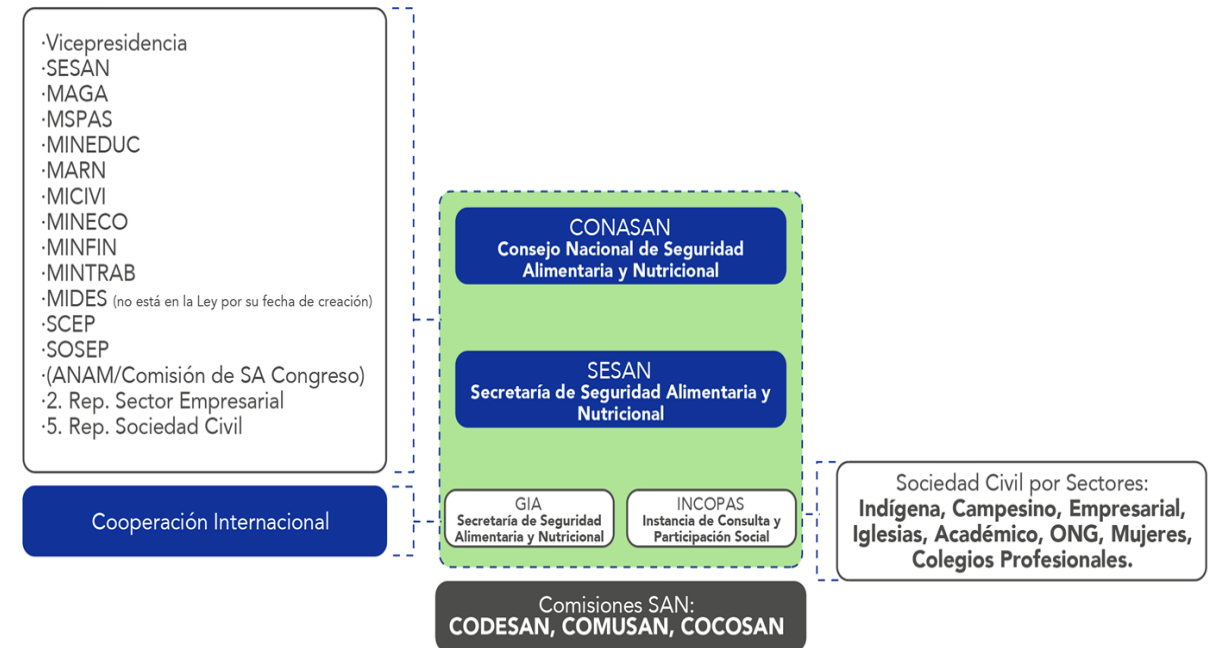

## Process description

- Phase 1: Development of 4 cycles of questions (123 questions collected).
- Review and prioritisation of questions (17 prioritised).
- Phase 2: Development of computer application\* for the collection and prioritisation of questions.
- \*The validation is ongoing

### Actores:

SESAN (Secretaría de Seguridad Alimentaria y Nutricional), MAGA (Ministerio de Agricultura, Ganadería y Alimentación), MSPAS (Ministerio de Salud Pública y Asistencia Social de Guatemala), MINEDUC (Ministerio de Educación), MARN (Ministerio de Ambiente y Recursos Naturales), MICIVI (Ministerio de Comunicación, Infraestructura y Vivienda), MINECO (Ministerio de Economía Guatemala), MINFIN (Ministerio de Finanzas Públicas), MINTRAB (Ministerio de Trabajo y Previsión Social), MIDES (Ministerios de Desarrollo Social), SCEP (Secretaría de Coordinación Ejecutiva de la Presidencia), SOSEP (Secretaría de Obras Sociales de la Esposa del Presidente de la República de Guatemala), ANAM (Asociación Nacional de Municipalidades de la República de Guatemala)

## Review of the process

### *Main challenges and lessons learned*

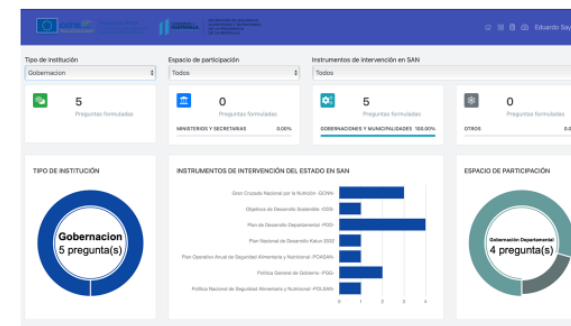

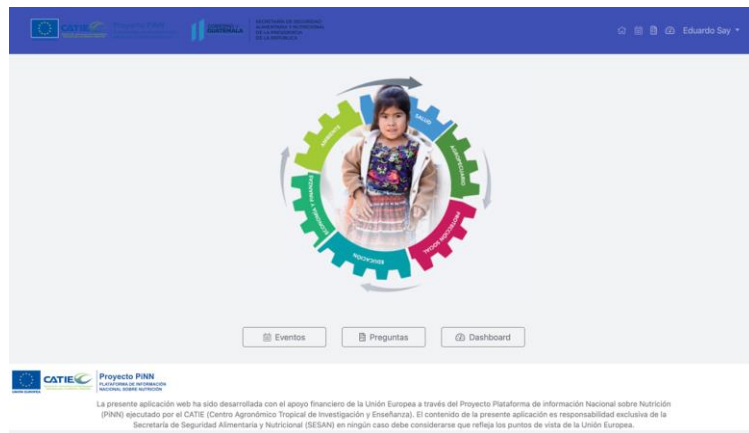

- Strengthen capacities of partners in the knowledge of the normative and strategic framework of nutrition and food security in the country to define relevant questions linked to national priorities.
- To cover in an adequate timeframe the collection of questions at different levels of the National Food Security System (national, departmental and municipal).
- Update the mapping of key processes to influence policy decisions and budget (Government Nutrition Strategy 2024-2027; SDG 2, Annual Operational Plans, etc.).
- Promote the formation and sustainability of multi-sectoral teams for validation and analysis of questions.
- Automate the collection of questions through a computer application to improve the organisation and prioritisation of information requirements.

## Process changes

### Operational framework: Collection of questions

- Elaboration of the methodology for the cycles of questions: activities, actors and roles, timetable and tools and instruments for implementation.
- Promote active participation and validation of implementation with key partners to ensure the sustainability of the NIPN operational framework.
- Elaboration of a web tool to collect and organise the questions with previously established technical criteria for a better control and follow-up of the analysis and communication of results.

### *Current/anticipated challenges and mitigation measures*

- Finalise the validation and socialisation of the software application at all levels of the food security system.
- Complete the two cycles of questions in coordination spaces at both national and sub-national levels.
- Efficiently communicate the results of the prioritisation and analysis of the questions, in order to positively affect national nutrition priorities.
